

M.V. "ETRI CK BANK".

Captain Smith of the Andrew Weir Shipping & Trading Co.Ltd., has called and stated that they propose either to advance or complete the Special Survey on the vessel's arrival at Durban in about a week's time.

Regarding our letter of the 31st December last, he has received a communication from the Master, saying that some of the items given therein as outstanding have already been dealt with, and that the Master has certificates in his possession to this effect.

Captain Smith will be obliged if we will inform the Durban Surveyor of the position, and instruct him to ensure that the vessel's Load Line Certificate is in order before she leaves. The Certificate will expire in April, and the Owners desire either a long term certificate or at any rate, a certificate for six months to be issued as a result of the Durban Survey.
