

18th November, 1952.

KIEL

691 "HENRIK DANICA". This vessel has today been classed #100 A1 with the appropriate notations recommended by you.

It is concluded that the steel used in the construction of this ship was of Open Hearth manufacture, also that the second deck beams were 130 x 65 x 8 and 65 x 50 x 7 angles, toe welded to the deck on every frame, but your confirmation of these matters is desired.

At the same time I shall be glad if you will furnish forging certificates for the sternframe and rudder.
