Received by Chief Engineer Surveyor.....

Received from Chief Engineer Surveyor.....

VESSEL'S NAME Fort La Baze Rpt. Ver. 5999 No. 5999

Remarks of the Chief Engineer Surveyor are desired on this case for the consideration of the Classing Committee.

(*The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement.—Extract from Sub-Committee's Report, 24/5/92.)

Type of Engine Triple Expansion.

If Boilers fitted with forced draught Yes

Tail Shaft. If fitted with a continuous liner Yes

If fitted with an outside gland of approved type No

The plan of boilers approved in New York has not yet been received, but the scantling given in the report meets the requirements of the Rules. ^{These however comply with American practice.} The boiler heads & part of superheaters have been made under American Bureau Survey.

This vessel's machinery appears to have been built in accordance with the Rules and the approved plans, and it is submitted she is

eligible to be classed + LMC 10.43.

Fitted for oil fuel 10.43, F.P. above 150 °F.

2 WTB 250 lb. (Sp: 230 lb.)
