

Stientje Mensinga

xman 12 RPH type engine Nos 57387/8

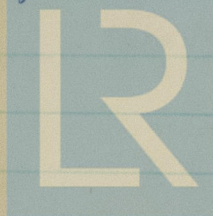

M Gear boxes 1659 + 1662

about Hull Surveyors be given copies of Bruno letter
11th, Interalf letter of 12th + B.C. letter to
all Surveyors of July 17 - 1948 all of which will
be self explanatory.

It would seem from the B.C. letter file for L.C.T. 367
that the ^{B.C.} reports covering the reconditioning of
the above engines, carried out in 1947/8, should
be on record at the Hull office for use in
connection with the engineering of Interalfs LCT 367
As it is 4 years since these engines were reconditioned
& will be necessary for the Surveyors to satisfy
themselves that they are still in an acceptable condition
for installation in a classed ship & to arrange for
such opening up as they consider necessary
in the circumstances.
