Classn(S)

Dear Sir,

S/S "LJUBLJANA"

Superintendent Ing. Burger of Messrs. Splošna Plovba Piran who are the Owners of the above ship visited this office today and explained that the Owners wish to retain this ship in service till the end of September 1963. As you know the Special Survey of this ship has been postponed from 3,62 till March 1963 after a general examination held in Pula in April last year.

The Owners now state that they need the ship in the present service (coal transport between Russian Black Sea ports and Yugoslavia) to comply with contracts already made and there is no other ship at present to replace the S/S "LJUBLJANA".

The Owners propose the following to be done:

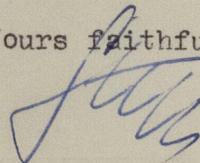

- General examination in drydock including some repairs if necessary.
- Main boiler survey
- Load Line renewal survey.

All the above surveys would be effected from end of March on, when the ship will be in one of the Yugoslav ports (Pula or Split).

The Owners are also agreeable to accept a limited service of the ship for the period from March to September i.e. for service between the Black Sea and Yugoslavia.

The Owners would very much appreciate to have your reply by cable.

Yours faithfully,

The Secretary
