

EXTRACT FROM CLASSING LETTER.

SYDNEY

-2-

3rd February, 1959.

31592 "SUVA BREEZE" - As recommended. I shall be glad if you will confirm that the safety valves of the Centre main boiler were also adjusted under steam at this survey.

"PORT PHILLIP" - A report has been received from the acting Surveyor at Gladstone, Queensland No. 284 covering a Loading Port Survey on the refrigerated cargo installation held between the 3rd and 10th January. The Surveyor states that the freshwater pipe in No. 2 upper tween deck has been renewed, but I shall be glad if you will ascertain and advise this Office whether wet insulation in way was dealt with.
