Inc'd

Dear Sir,

M/V "INGER SKOU"
Copenhagen first Entry Report No. 14697.

In reply to your classing letter of the 6th inst. regarding the emergency ejection pipe on the above vessel, this was fitted at 6" dia. as stated on the first entry report and on the original plan no. 3.B.3625.

Unfortunately when the approved plan was received the piping arrangements on board the vessel were all complete and it did not appear justified to insist on compliance with the Rules for the small increase required especially as the emergency bilge suction on this vessel are very adequate with additional 6" & 4½" suction to the one in question, and it is hoped that the present arrangements can be considered in order.

Yours faithfully

R. Bolton
