

GLASGOW,

5th September, 1924.

J.F. NICHOLSON

Messrs. Cochran & Co. Anna Ltd., examine the Donkey Boiler No. 9391 made by them to the order of Messrs. Stabilimento Tecnico Triestino (Fabbrica Macchine Sant 'Andrea) Trieste.

The scantlings of the Boiler were found to be in accordance with the Rules of Lloyd's Register for a working pressure of 100 lbs per square inch. The steel material used in the construction of the Boiler was tested by the Society's Surveyors in accordance with the Rules, and the workmanship, so far as seen, was good.

The Boiler was tested by hydraulic pressure to 200 lbs per square inch in the presence of the undersigned Surveyor and was found sound and tight at that pressure.

Working pressure is to exceed One Hundred pounds per square inch.

Marks on Boiler No. 9391.

No. 16593.
