7th June, 1940.

BRISTOL.

4408 "PETER JOLIFFE" Before this case receives the attention of the Committee I have to refer you to your letter of the 14th July last in which it was stated that the moulded depth of this vessel was to be increased from 9' to 9' 6", and I shall be glad if you will state whether you are correct in reporting this depth to be 9' as per your First Entry Report and the plans forwarded therewith. It is concluded that cement is fitted in the bottom of the peak compartments, but I shall be glad if you will state whether this is so. I have also to refer you to Section 32, Clauses (a) and (c), of the Rules and request you to state whether these requirements have been complied with. The nature of the coatings "Arodite", Ref.G.5188 and G.2830, should be stated, and whether the use of this coating has been mentioned by the Owners. At the same time please forward the forging reports.
