ANSO

Sirs,

T.E.S. "HYRCANIA".

We have to acknowledge your letter of the
ultimo, together with Hull and Machinery
Classification Certificates, for which we are
grateful, and your remarks have been noted for
reference.

With regard however, to your notation that
classification assigned is subject to 30 fathoms
main cable being supplied, we find that according
to our records, 2 new lengths each of 15½ fathoms
were supplied by Messrs. Harry Cocks & Co. of Cardiff,
and placed on board the vessel at Birkenhead whilst
undergoing repairs and remeasurement, etc., during
January/March, 1948.

In this connection, it is observed that Lloyd's
Certificates were numbered 17096/97.

For your further information, whilst the "HYRCANIA"
was being surveyed in the River Tyne in July last, the
cables were ranged in drydock, and we were given to understand
by the Marine Superintendent he was informed by Lloyd's
Surveyor, who was present, that the cables were in order.

In due course, perhaps you will be good enough to
acknowledge our observations hereon.

Yours faithfully,

FOR AND ON BEHALF OF
THE BALTIC TRADING COMPANY LTD.

E. Leggett
