

"NUEVA ANDALUCIA".

-----

N.Yk.40111.

This vessel has been built in Germany by the Deutsche Werft and the machinery made by M.A.N. at Augsburg and also by the Deutsche Werft at Hamburg.

No First Entry Report has been received.

A draft report has been prepared as far as possible from the approved plans, the machinery being similar to that in the motorship "NUEVA GRANADA" and "SKANDINAVIA", except that it is not known whether this applies to the electrical equipment or to other particulars, as for instance, auxiliary engines.

A report has now been received from the New York Surveyors stating that the vessel was examined in dry dock after encountering ice.

It is submitted the Owners be requested to arrange a suitable opportunity for a general examination to be made and to the above particulars verified or amended as necessary.

This draft report should be retained in this Office and a copy forwarded to the New York Surveyors.
