

Whaler "STAR XII"

The Classification position is as follows:

Last date of Docking Survey	7,55
Main Boiler Survey due	7,56
Screwshaft Survey due	6,57.

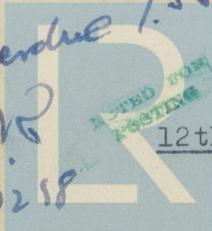

The next Special Survey becomes due in October, 1959.

It is not the Committee's practice to record a "Laid Up" notation in the case of a Whaler which is out of commission for one season, but as this craft was laid up in October, 1956, and was not to be commissioned during the 1957 season, the Committee decided on 29.10.57 to record a notation of "Laid up - Surveys overdue".

The ship is still laid up.

Instructions are sought as to what amendment should be made to the above-mentioned notation to bring it into line with the standard notations decided upon at the Committee Rota Members' meeting of 20.11.58.
