Lloyd's Register of Shipping.

Port of H A M B U R G .

8th October, 1936.

No. 3162.

This is to Certify that

P. A. Krützfeldt

the undersigned Surveyor to this Society did at the request of Messrs. Fried. Krupp Germaniawerft A.G. attend their works at Kiel-Gaarden on the 29th September, 1936 for the purpose of witnessing the hydraulic test of one superheater complete with tubes and headers intended for a Lancashire type Boiler now under construction at Devgad, Baria State, British India.

This superheater has been subjected to hydraulic pressure of 495 lbs per sq. inch in finished condition and was found, as far as could be seen, to be sound and tight under that pressure. The material used in the construction was found free from surface defects and the workmanship was satisfactory.

One of the two headers has been stamped for identification

LLOYD'S TEST 495 lbs

W.P. 165 lbs

SURVEYOR TO LLOYD'S REGISTER.

This Certificate is issued upon the terms of the Rules and Regulations of the Society, which provide that:—

“While the Committee use their best endeavours to ensure that the functions of the Society are properly executed, it is to be understood that neither the Committee nor the Society are under any circumstances whatever to be held responsible for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default, or negligence of the Surveyors, or other Officers or Agents of the Society.”
