And.
LONDON

Dear Sir,

In reply to your query in the Classing Letter of 9th inst. regarding the motor vessel "ATTILA", Newcastle First Entry Report No. 86497, I have to state that the area of safety valves for the Waste Heat Donkey Boiler is 6.28 square inches, and the area of the oil fired Donkey Boiler 9.8 square inches. These safety valves are of the high lift type. I regret the omission on this occasion.

I am, Dear Sir,

Yours faithfully,

L. Pecked.
