Dear Sirs,

SPECIAL SURVEY S.T. STANBELL

We submit herewith for approval our proposals, agreed with the owners, for the above vessel.

It will be seen from the plan enclosed, that it is intended to renew all parts shown in red, it is also agreed to renew all parts shown in green and also the blue parts where they have a liaison with the green.

The red, indicated, has already been taken in hand and we have this day given orders for the other agreed items to be renewed.

It is considered that when this work has been undertaken, (it will be in the region of 260 tons of new steel), together with the considerable amount of conversion work that the vessel will be in very good state.

Please note that on the port longitudinal bulkhead where X has been marked it is intended to replace this also with new steel.

Trusting this will meet with your approval and would ask that you give us the earliest possible reply in view of the nature of the work.

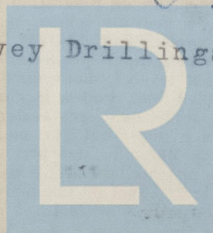

We remain

yours faithfully,

J. Rudman

Enclosure - 2 copies of special Survey Drillings Drawing.
