

Rpt. 4b.

REPORT ON OIL ENGINE MACHINERY.

No. 13662

Received at London Office

14 APR 1944

Date of writing Report 19... When handed in at Local Office 19... Port of Belfast
No. in Survey held at... Date, First Survey 12 Oct. 1943 Last Survey Jan. 8 1944
Reg. Book. Number of Visits 17
Single
on the Triple Screw vessel "NASSARIUS" Tons { Gross...
Quadruple Net...
Built at Belfast By whom built Harland & Wolff Ltd. Yard No. 1195 When built 1944
Engines made at... By whom made... Engine No. When made...
Donkey Boilers made at Belfast By whom made Messrs Harland & Wolff Ltd Boiler No. 60,8459 When made 1943
Brake Horse Power... Owners Anglo-Paxon Petroleum Co Ltd Port belonging to London
Nom. Hor. Power as per Rule... Is Refrigerating Machinery fitted for cargo purposes... Is Electric Light fitted...
Trade for which vessel is intended...

OIL ENGINES, &c. — Type of Engines... 2 or 4 stroke cycle... Single or double acting...
Maximum pressure in cylinders... Diameter of cylinders... Length of stroke... No. of cylinders... No. of cranks...
Mean Indicated Pressure...
Span of bearings, adjacent to the crank, measured from inner edge to inner edge... Is there a bearing between each crank...
Revolutions per minute... Flywheel dia... Weight... Means of ignition... Kind of fuel used...
Crank Shaft, { Solid forged
Semi built dia. of journals as per Rule... Crank pin dia... Crank webs Mid. length breadth... Thickness parallel to axis...
All built as fitted... Mid. length thickness... shrunk Thickness around eyehole...
Flywheel Shaft, diameter as per Rule... Intermediate Shafts, diameter as per Rule... Thrust Shaft, diameter at collars as fitted...
Tube Shaft, diameter as per Rule... Screw Shaft, diameter as per Rule... Is the { tube
as fitted... 16" as fitted... screw } shaft fitted with a continuous liner { yes ✓
Bronze Liners, thickness in way of bushes as per Rule... as approved... Thickness between bushes as per Rule... as approved... Is the after end of the liner made watertight in the
propeller boss... Yes... If the liner is in more than one length are the junctions made by fusion through the whole thickness of the liner... ✓
If the liner does not fit tightly at the part between the bearings in the stern tube, is the space charged with a plastic material insoluble in water and non-
corrosive... ✓ If two liners are fitted, is the shaft lapped or protected between the liners... ✓ Is an approved Oil Gland or other appliance fitted at the after
end of tube shaft... no If so, state type... ✓ Length of bearing in Stern Bush next to and supporting propeller 5'-0" ✓
Propeller, dia. 15'-6" Pitch 12'-0" No. of blades 4 Material Bronze whether moveable no Total developed surface 75 sq. feet
Method of reversing Engines... Is a governor or other arrangement fitted to prevent racing of the engine when declutched... Means of
lubrication... Thickness of cylinder liners... Are the cylinders fitted with safety valves... Are the exhaust pipes and silencers water cooled
or lagged with non-conducting material... If the exhaust is led overboard near the waterline, what means are arranged to prevent water from being syphoned
back to the engine... Cooling Water Pumps, No... Is the sea suction provided with an efficient strainer which can be cleared within the vessel...
Bilge Pumps worked from the Main Engines, No... Diameter... Stroke... Can one be overhauled while the other is at work...
Pumps connected to the Main Bilge Line { No. and size...
How driven...
Is the cooling water led to the bilges... If so, state what special arrangements are made to deal with this water in addition to the ordinary bilge pumping
arrangements...
Ballast Pumps, No. and size... Power Driven Lubricating Oil Pumps, including spare pump, No. and size...
Are two independent means arranged for circulating water through the Oil Cooler... Suctions, connected to both main bilge pumps and auxiliary
bilge pumps, No. and size:—In machinery spaces... In pump room...
In holds, &c...
Independent Power Pump Direct Suctions to the engine room bilges, No. and size...
Are all the bilge suction pipes in holds and tunnel well fitted with strum-boxes... Are the bilge suction in the machinery spaces led from easily
accessible mud-boxes, placed above the level of the working floor, with straight tail pipes to the bilges...
Are all Sea Connections fitted direct on the skin of the Ship... yes... Are they fitted with valves or cocks... both... Are they fixed
sufficiently high on the ship's side to be seen without lifting the platform plates... Are the overboard discharges above or below the deep water line...
Are they each fitted with a discharge valve always accessible on the plating of the vessel... Are the blow off cocks fitted with a spigot and brass covering plate...
What pipes pass through the bunkers... How are they protected...
What pipes pass through the deep tanks... Have they been tested as per Rule...
Are all pipes, cocks, valves and pumps in connection with the machinery and all boiler mountings accessible at all times...
Is the arrangement of valves and their connections such as to prevent the possibility of water passing from the sea or from water tanks into the cargo or machinery
spaces, or from one compartment to another... Is the shaft tunnel watertight... Is it fitted with a watertight door... worked from...
If a wood vessel, what means are provided to prevent leakage of either fuel oil or of lubricating oil from saturating the woodwork...
Main Air Compressors, No... No. of stages... diameters... stroke... driven by...
Auxiliary Air Compressors, No... No. of stages... diameters... stroke... driven by...
Small Auxiliary Air Compressors, No... No. of stages... diameters... stroke... driven by...
What provision is made for first charging the air receivers...
Scavenging Air Pumps, No... diameter... stroke... driven by...
Auxiliary Engines crank shafts, diameter as per Rule... No... Position...
as fitted... Have the auxiliary engines been constructed under special survey... Is a report sent herewith...

004527-004533-0101

AIR RECEIVERS:—Have they been made under survey yes ✓ State No. of report or certificate 21083 ✓

Is each receiver, which can be isolated, fitted with a safety valve as per Rule.....

Can the internal surfaces of the receivers be examined and cleaned yes ✓ Is a drain fitted at the lowest part of each receiver yes ✓

STARTING

Injection Air Receivers, No. 2 ✓ Cubic capacity of each 900 cu ft Internal diameter 6'-0 5/16" thickness 1" ✓

Seamless, lap welded or riveted longitudinal joint Riveted ✓ Material Steel Range of tensile strength 28/32 t Working pressure 361.5 lb/sq in Actual 356 lb/sq in

INJECTION
STARTING

Air Receivers, No. ✓ Total cubic capacity ✓ Internal diameter ✓ thickness ✓

Seamless, lap welded or riveted longitudinal joint ✓ Material ✓ Range of tensile strength ✓ Working pressure by Rules Actual ✓

IS A DONKEY BOILER FITTED (2) yes If so, is a report now forwarded.....

Is the donkey boiler intended to be used for domestic purposes only.....

PLANS. Are approved plans forwarded herewith for shafting..... Receivers 26/5/41 Separate fuel tanks.....

Donkey boilers 26/5/41 General pumping arrangements..... Pumping arrangements in machinery space.....

Oil fuel burning arrangements.....

SPARE GEAR.

Has the spare gear required by the Rules been supplied.....

State the principal additional spare gear supplied.....

The foregoing is a correct description,

Manufacturer.

Dates of Survey while building { During progress of work in shops - - 1943 0x12 29 NW. 2 10 15 16 29 30 Dec 3 7 11 15 17 29 Jan 3 4 8
During erection on board vessel - -
Total No. of visits.....

Dates of examination of principal parts—Cylinders..... Covers..... Pistons..... Rods..... Connecting rods.....

Crank shaft..... Flywheel shaft..... Thrust shaft..... Intermediate shafts..... Tube shaft.....

Screw shaft at Glasgow Propeller 10.11.43 Stern tube 7.12.43 Engine seatings..... Engine holding down bolts.....

Completion of fitting sea connections 11.12.43 Completion of pumping arrangements..... Engines tried under working conditions.....

Crank shaft, material..... Identification mark..... Flywheel shaft, material,..... Identification mark.....

Thrust shaft, material..... Identification mark..... Intermediate shafts, material..... Identification marks.....

Tube shaft, material..... Identification mark..... Screw shaft, material..... Identification mark.....

Identification marks on air receivers.....

N^o 265
LLOYD'S TEST 5564/D
W.P. 356 lb/sq in
5.11.43 T.D.S. ✓

N^o 266
LLOYD'S TEST 5564/D
W.P. 356 lb/sq in
5.11.43 T.D.S. ✓

Is the flash point of the oil to be used over 150°F.....

Have the requirements of the Rules for oil fuel pipes and tank fittings been complied with.....

Description of fire extinguishing apparatus fitted.....

Is the vessel (not being an oil tanker) fitted for carrying oil as cargo..... If so, have the requirements of the Rules been complied with.....

If the notation for ice strengthening is desired, state whether the requirements in this respect have been complied with.....

Is this machinery duplicate of a previous case..... If so, state name of vessel.....

General Remarks (State quality of workmanship, opinions as to class, &c. The air receivers, donkey boilers, propeller & screw shaft have been fitted in place & the vessel has proceeded to the Clyde for installation of the machinery.

The amount of Entry Fee ... £ : : }

Special ... £ : : }

Donkey Boiler Fee... £ : : }

Travelling Expenses (if any) £ : : }

When applied for..... 19.....

When received..... 19.....

Committee's Minute.....

Assigned.....

Engineer Surveyor to Lloyd's Register of Shipping.
