

Steamer "SALAMMANNA"

Mr. E. Gourdomicalis has telephoned that this vessel is now under survey at West Hartlepool and that the Surveyors are requiring repairs to leakages that have been found on the tank top in No. 1 hold.

The repair of these leakages will mean considerable expense in cleaning the double bottom tanks in way, and the Owners appeal for permission to take the ship to Alexandria via Bayonne with cargo. If this is agreed, they propose to clean the tanks while on voyage and will carry out the necessary repairs on arrival at Alexandria.

The matter is of considerable urgency and importance to the Owners and they will be obliged if we will telephone our Surveyors this afternoon in an endeavour to help the departure of the ship.

7th June, 1963.
