QUESTION

With reference to the Main Boiler Survey which became due at the end of May, I would inform you that to complete the inspection for the Record MBS 6.65 the starboard boiler requires to be examined in its entirety, its safety valves adjusted under steam and the oil burning system and remote controls examined under working conditions, I shall be glad to learn what arrangements are proposed to be made for these matters to be dealt with.

ANSWER

Date:— 24th September, 1965.

We have contacted the previous Owners' Agents at Genoa, but they informed us that they do not know anything about the new Owners or whether they have an Agent in Italy.

We are therefore sorry to state that we are not in a position to reply to your enquiry.
