

"EMPIRE ALDGATE".

IT IS SUBMITTED Mr. Brand be informed
it is noted that according to the Certificate of Test issued
by Messrs. Campbell & Isherwood Ltd. on the two generators for
this vessel (that) they have been flash tested for 1,500 volts.
In accordance with the Rules for Electrical Equipment and also
in accordance with B.S. requirements all machines are required
to have a minimum high voltage test of 2,000 volts for one
minute. The Surveyor should be asked for his comments as to
why these machines have been accepted below Rule requirements,
and what steps can be taken to apply the Rule test. It should
be pointed out that in his Report he states that the results
were found as per Rule, which is obviously incorrect.
