

23rd September, 1949.

Dear Sirs,

With reference to your letter of yesterday's date asking for freeboard particulars in the case of the steamer "BOKKEVELD", I think it well to give you the advance information that, at a confirmatory survey which was held on this vessel recently, the Society's Surveyors at Cape Town and Port Natal reported adversely on the vessel's condition, as the result of which the Classing Committee today declined to assign any classification whatever or authorise the issue of any load line certificate until such time as the Special Survey is re-held by the Society's Surveyors and all repairs effected to their satisfaction.

You will be advised of the details within a few days.

Yours faithfully,

(Copy Filed)  
Clerk to the  
Classification Committee

The Surveyors,  
14, Blythswood Square,  
Glasgow.
