s.s. "PAN".  
----

To complete the Boiler Survey which became due in June last, the safety valves require to be adjusted under steam.

In reply to enquiry the Owners now state that as all their other steamers are classed with the Norske Veritas and their new steamers will be classed with that Society, they consider it most convenient to change the class of the above steamer to the Norske Veritas.

IT IS SUBMITTED that in the circumstances the class of this vessel be withdrawn from the Register Book and three dots insert in lieu thereof, indicating withdrawal of class at Owners' request.

Withdraw class.
