

"SAINT BERTRAND"

Nts.

It is submitted the Surveyor, in reply to his letter of the 17th instant, be informed that the weight of the stream anchor as given in his First Entry Report is not in excess of Rule requirements, but could be accepted. The length of the stream chain on board, however, is deficient by 55 fathoms.

He could therefore recommend that the vessel's class be made subject to 30 fathoms of chain cable and additional stream chain being supplied at the first opportunity to bring the equipment of this vessel into line with Rule requirements.
