Leith, 9th November 1927.

Dear Sir,

Herewith I acknowledge your letter of 5th inst. and in reply to your enquiries concerning my first entry Report No. 17275 on the ss. "PENTOR" I may state that the bridge side plating butts are quadruple riveted and not treble as stated; the spacing of rivets in the seams of the shell plating, and the tests of the hawsers and warps are as required by the rules.

I regret that this information was not stated correctly.

I am, Dear Sir,

Yours faithfully,

THE SURVEYORS
