Reference

S.

Dear Sir,

In reply to your letter of the 20th instant respecting Report No. 112944 on "VIC 101", I have to state that the thickness of the raised quarter deck plating is .24 ins.

The main steam pipes were tested by hydraulic pressure on the 21st June, 1945 to 240 lb. per sq. inch.

It is regretted that these items should have been omitted from my report.

I am, Dear Sir,  
Yours faithfully,

J. J. Russell

The Secretary,  
WOKINGHAM.
