Your ref:

GO/MB.

Dear Sirs,

3rd March, 1947.

In reply to your letter of the 20th ultimo addressed to Mr. Ferguson respecting your hopper barge "ANDROMÈDE No.1", I regret to say that this Society has no plans of main engines of this vessel.

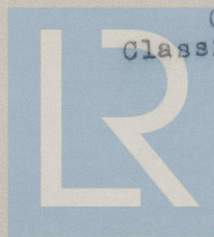

It is understood from the Society's Surveyor at Marseilles that you have now put forward a proposal for repairing the existing engines, consisting principally in renewing the LP and HP cylinders and repairing the IP cylinder feet by welding in accordance with a plan which the Surveyor has forwarded.

With regard thereto, I have the pleasure to say that the Marseilles' Surveyor is being informed that this method of repair could be approved provided additional mild steel reinforcements be fitted to the IP cylinder to his satisfaction.

Yours faithfully,

Societe Anonyme Ossude,
11, Rue D'Aguesseau,
PARIS (8^e).
