Referred to the Chief Ship Surveyor.

700 M

28 SEP 1923

28 SEP 1923

Submitted the Paris drawings him formed by
note that the watertight bulkhead at the forward end of the
machinery space may be fitted at frame 89 if desired
and opening may be made in the bulkhead at frame 81 making it
no longer a watertight bulkhead. The new bulkhead at frame 89 must
be adequately supported at the deck, and the space above this bulkhead and
forward of the boiler must be reserved for bunkers only and not for cargo.
