

" ARABIA"n.n."ARABIA II"

This ex Italian motor vessel was seized off East Africa and afterwards taken to Aden and then to Massaua where she will be used as a coal storage craft under the aegis of the Ministry of War Transport who are not appointing Managers owing to her employment.

According to information received from the Registrar General her name has been changed to "ARABIA II" and a note of this together with the necessary change of Ownership has already been made in the Register Book. Her class, however, still stands therein with a notation of "Surveys Delayed" and it is accordingly submitted for consideration whether this should remain undisturbed in the Reprint or whether her class should not be deleted.

  
7th May, 1942.
