

Lloyd's Register of Shipping,

BERT,
SURVEYOR.

LLOYD'S REGISTER.
LONDON.

RECEIVED 5 AUG 1919

ANSW

5, Alexandra Buildings,

Hong Kong, June 10th. 1919.

Sir,

I enclose herewith a copy of my Deadweight Computation report on the steamer "WAR DRUMMER" Official No.142.223 built by the Hong Kong & Whampoa Dock Co. after having checked the builders figure.

It will be noted on the end of the report that on making out my verification freeboard from the official tonnages an addition of $2\frac{1}{2}$ " could be made to the vessel's load draft compared with the preliminary freeboard of $4'-6\frac{1}{2}"$ and making the new draft $21'-11\frac{3}{4}"$ BK.

I discussed this matter with the builders and the owners representative, and it was arranged that although the vessel may get $2\frac{1}{2}"$ less freeboard, than the preliminary figures, making the new summer $4'-4"$, the deadweight scale has been made out giving the vessel only 2" more draft than before, the new Load draft being $21'-11\frac{3}{4}"$ BK. assuming my figures on the verification freeboard are correct.

I am charging a fee of \$300 for this survey, which compares favourably to that charged in the United States for these deadweight computations.

I am, Sir,

Your obedient servant,

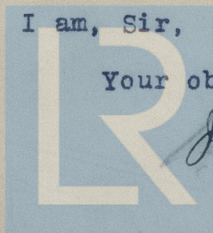

John. S. Gardiner

The Secretary,

Lloyd's Register,

London.
