

21st February 1948.

Messrs. Trinidad Leaseholds Ltd.,
Point-a-Pierre.

Attention Mr. Gray, Actg. Marine Supt.

Dear Sir,

Reference general examination of cargo tanks of your s.s
"PIERRE" on 19th inst, before a list of necessary repairs can be drawn
up, the tanks will require to be chipped and scaled as follows:-

No. 1, 2 & 3 Tanks, Port & Stbd.

Deck beams and knees
Main thwartship beams
Vertical stiffeners on summer tank bulkheads
Margin brackets on floors

No. 3 Tank, Port & Stbd
Floors. (in addition to above)

Summer Tanks
Shipside frames
Deck beams and knees.

I would point out that the general condition of this vessel's
cargo tanks had deteriorated considerably since last examination, and on
preliminary examination, it would appear that considerable repairs will
require to be effected before the vessel is in a fit state to proceed to
the United Kingdom.

Yours faithfully,

(Signed)
