

Ship Surveyor .....

Received from Chief Ship Surveyor .....

AME Steel S.S. "EASTERNER". Rpt. Nwc. No 73372

Remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report, 24/5/02.)

This vessel, originally one of the "Kil" class fast trawlers, as built by Messrs. Smiths' Dock Co.Ltd. in 1918, under the survey of the British Corporation. The vessel is similar to those built under the survey of this Society, to plans mutually approved by both societies, and which were originally classed A1 "For Government Service" and are now being converted into cargo vessels and classed 100 A.1.

A first entry report has now been received from the Newcastle Surveyors giving particulars of scantlings etc. and these appear to be in accordance with the plans mutually approved. In addition the Surveyors state that this vessel has also been converted into a cargo vessel in accordance with approved plans for the 100 A.1. class, and repairs effected to minor damages sustained on Government Service.

The weight of the stream anchor is slightly less than approved and the collective weight of the anchors is in excess of weight approved and it is submitted the stream anchor might be accepted.

It is submitted the vessel might be classed 100 A.1.

100 A.1.

1 Dk. (Steel).

Cell DB u E 26' 20t. FPT 20t.

EK. 5 BH. Cem. Lloyd's A.& C.P. B 50'.

Date of build 1918.

The Certificate of Classification, to be endorsed "Cargo battens not fitted," and the same notation to be printed in the Register Book.

It is concluded the thickness of Bridge Side Plating is as appropriate but the Surveyors should be requested to state if this is so.
