HONG KONG

30th. December, 1947.

The Secretary,
Lloyd's Register of Shipping,
LONDON.

RECEIVED
10 JAN 1948
ANSD.....

Dear Sir,

We are in receipt of your letter of 5th. instant in regard to Hong Kong Report No.9140 on the steamer "PING WO" ^{kw. TEH ON} and note the records to be inserted in the Register Book.

No note was made as to the shaft diameters under the liners although care was taken to ensure that the shafts were not machined beyond the diameter at top of taper. Enquiry at the shipyard has resulted in the following information which unfortunately cannot be confirmed by the undersigned.

Dia. of shaft under liner port 8.7/8".
starboard 9.5/32".

We trust this information will prove sufficient for requirements.

Vessel has now proceeded to Shanghai and a copy of this correspondence is being forwarded to that Port for the advice of the Surveyor there.

Yours faithfully,

J. A. H. [Signature]
For the Surveyors.
