

64

(G.L.D. 1927)

YOKOHAMA,

8th September, 1926.

R. O. Batchelor

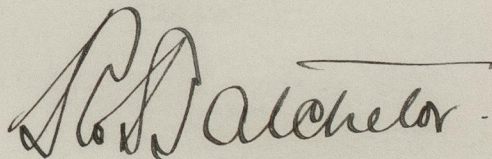

Messrs, the Oshima Steel Works examine and test at their works at Oshima Tokyo on the 8th and 12th of June one forged steel upper stem bar and found same to be a good forging.

A satisfactory bend test was made from a test piece taken from the forging.

This stem bar is intended for Messrs. The Uraga Dock Co's vessel No. 316.

The mark and tensile test result is as follows:-

<u>TENSILE TONS PER</u> <u>SQ. IN.</u>	<u>ELONGATION.</u>	<u>MARK.</u>
28.0	34.0%	Lloyd's No. 37 R. O. B. R 12-6-26
