

16th January, 1941.

Riga.

Steamer "EVERITA".

With reference to the Boiler Survey which became due at the end of March last year on the above vessel, I have to acquaint you that she was reported to be under survey at Copenhagen on 29th of that month, for "DAMAGE AND BOILER SURVEY". No report of this inspection has come to hand from the Surveyors, and in the circumstances I shall be glad if you will get intouch with the Owners and let me know whether they are in a position to furnish any documentary evidence as to the extent of the survey carried out at that time.
