

SPARE LIST

One propeller
One tail shaft
One cylinder cover complete with valves casings, springs and other fittings
One complete set of valves, springs and other fitting for one cylinder
Four needle valves
One piston complete with springs, studs etc.
One set of piston springs for one piston
One piston rod
One complete set of skew wheels
One set of studs and nuts for one cylinder cover
Two crosshead bolts & nuts
Two crank pins bolts & nuts
Two main bearing bolts
One set of bolts for crank shaft coupling
One set of bolts for wheel shaft coupling
One set of bolts for intermediate shaft
One set of piston rings for each size of main & auxiliary compressor piston
1 half set of suction and delivery valves of each size used in the main & auxiliary compressor.
10% of scavenge air pump delivery valves
Complete working parts for fuel pump
Spare water circulating pump
Complete set of valves, springs etc. for one cylinder of the Auxiliary engine.
Three fuel needle valve
One set of piston rings for one piston of Auxiliary engine
One gudgeon for trunk piston
Two crank pin bearing bolts for Auxiliary Diesel Motor
Two crank pin bearing bolts for Auxiliary compressor
Two main bearing bolts & nuts for Aux. Diesel Motor and for Auxiliary compressor.
One set of piston rings for one piston of each size used in the Diesel Motor compressors
1 half set of suction and delivery valves for each size used in the Auxiliary air compressors
Complete working parts for one fuel pumps of the aux. Diesel eng.
One set of suction and delivery valves for daily fuel supplied pump
One set of suction and delivery valves for bilge and for ballast pumps
A length of pipe of each size used for fuel delivery and injection air pipes to main and auxiliary power cylinder and the air delivery from the main & aux. compressor to the compressor with union and flanges
Assorted quantity of bolts and nuts.
