Hamburg report No. 17044<sup>x</sup> on four vertical  
Donkey Boilers, Genoa Mch report No. 10081  
(fitting on board)

The boilers mentioned in these reports were  
evidently originally intended to be fitted on  
board the Motor Vessels Orazio & Virgilio, built  
at Baia by the Cant. ed. Off. Meridionali. Two  
of these boilers, Cert Nos. 442 & 444 were actually  
fitted in the Orazio, but, as they were found to  
be unsuitable, they were subsequently removed  
and replaced by two new boilers Hamburg Cert.  
Nos. 460 & 461. There is as yet no record of the  
other two boilers being put into service.

The above four boilers in a classed vessel,  
Ham. report No. 17044, <sup>with the Genoa rpt. 10081 attached,</sup> will be dealt with as  
an "Unclassed" Boiler Report.

2 of these boilers to be  
fitted in slab rec. vessel.  
Nos. 443 & 444  
Copies of rpt sent to 2/1/29 (8).

No 773  
- 774  
M.V. Fukuyama  
- Himalaya

See additional notes on  
Index Cards as to disposal  
of these boilers
