

Kawasaki 380 7/8
Shafting Certificate.

Kobe,

2nd December, 1915.

A. L. Jones

Messrs. The Kobe Steel Works attend at their Works on various date from 11th March to 11th November 1915 for the purpose of inspecting in the forged, rough turned and finished stated, and making tests from:-

Seven crank shafts, $13\frac{1}{8}$ " diam.

Three propeller shafts, $13\frac{3}{8}$ " diam. (fitted with continuous gun metal sleeves.)

Two thrust shafts, $12\frac{1}{2}$ " diam.

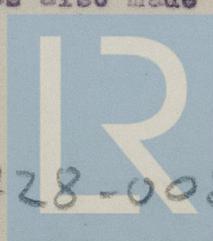

Sixteen intermediate shafts, $11\frac{7}{8}$ " diam.

Made to the order of Messrs. The Kawasaki Dockyard Co. Ltd. and intended for the steamer, Yard No. 380 under construction at the Kawasaki Dockyard.

The above named shafts were found, as far as could be ascertained sound and free from defect.

The sizes of the ingot used, the results of the tensile tests, and the marks stamped on the finished shafts are as follows:-

A satisfactory bending test was also made from each forging.
