

008753 - 008758 - 0133

Zabra.

L. A. 1285.

Before this case reaches consideration  
IT IS SUBMITTED the surveyor be requested  
to state whether the oil fuel & steam  
smothering installations have been  
examined also whether the valves cocks  
pumps & strainers of the pumping arrangements  
have been opened out examined & tested  
as required by par C. 406 of the Rules.

It is concluded that all sea connections  
were examined & the boiler room, after  
repairs, in safe working condition but  
this conclusively should be confirmed  
The surveyor should also state a definite time  
limit for the renewal of the condenser tubes per  
2.10.53
