

"KYOHO MARU" - Yka. 1330.

Before this case receives consideration
IT IS SUBMITTED the Surveyors be requested to furnish
copies of the approved structural plans for the deep
tanks and Orlop deck now fitted.

They should also be informed it is concluded that:-

- (1) The present notation in the Register Book regarding the 4 divisional W.T. BH's in 'tween decks remains unaltered.
- (2) The deck notation should now read - "2 dks., 3rd dk. in No.1 hold" - although the Pumping Plan shows a 3rd deck (termed 2nd dk. on plan) throughout the holds.
- (3) The Special Survey will be completed by 4.55 if the parts now examined for Special Survey are to be credited.

The above should be confirmed.

They should be further informed it would appear that from the Pumping Plan there was a bulkhead previously at frame No.123, although this cannot be confirmed from previous plans in this Office, and their comments are requested.

In future similar cases it would be helpful if the Surveyors, in the heading of their reports included "Oil Fuel Conversion" and recommended the appropriate notation.
