

"HIYEHARU MARU"

Submitted the Kobe Surveyors be informed in reply to their letter of 13th instant that, in response to enquiry in 1960, the New Orleans Surveyor stated that the aft gas condenser was examined at that time. No mention was made on his report about this item but, if the Surveys Book shows that it was tested as per Rules, it will be accepted.

The Surveyors should also be informed they are quite correct regarding the inboard gas evaporator and we apologise for not making it clear that, according to our records, the outboard gas evaporator is outstanding.

Their further comments on both these matters will be appreciated as soon as possible.
