

Lloyd's Register of Shipping.

Port

PUNTA ARENAS MAGALLANES CHILE.

5th. May. 1944.

This is to Certify that

I, Edward. S. Hunter
the undersigned Surveyor to this Society did at the request of

Mr. W.W. Watson, Lloyds Agent at this port, proceed on board the
S.S. "RIO VERDE" of 679 tons, of VALPARAISO, anchored in the Punta
Arenas Roads, for the purpose of surveying the Donkey Boiler, and
found :-

2nd. May. The boiler thoroughly clean and free from
scale, the Furnace crown, uptake, shell plates, and rivets in
good condition. The cross tubes, compensating rings, and rivets
in good condition.

In view of the fact that this boiler had not
been in service since the last hydraulic test, I did not consider
it necessary to repeat it. However I requested to see the boiler
under conditions.

4th. May. I examined the Donkey Boiler under full steam
pressure of 100 lb. per square inch, at which pressure the safety valves
are set. No defects appeared.

I hereby recommend that the record be retained as in the register
book.

LLOYD'S AGENCY

E. S. Hunter
passed A.M.I. Mech. 1926.

SURVEYER APPOINTED BY LLOYD'S AGENT.

This Certificate is issued upon the terms of the Rules and Regulations of the Society, which provide that:-

"While the Committees of the Society use their best endeavours to ensure that the functions of the Society are properly executed, it is to be understood that neither the Society nor any Member of any of its Committees is under any circumstances whatever to be held responsible for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default or negligence of any of its Committees or any Member thereof, or the Surveyors, or other Officers or Agents of the Society."
