

Lloyd's Register of Shipping.

FOUNDED 1760.

RE-CONSTITUTED 1834.

CERTIFICATE FOR ENGINES AND BOILERS.

No. 56452
16954

No. 71, Fenchurch Street, E.C.,
LONDON, 15th August, 1922

This is to Certify that the Engines and Boilers of the
Steel Twin Screw Steamer "Nakozaki Maru"
of Tokio Master ✓ Tons 10413
have been Specially Surveyed by the Surveyors to this Society during
construction at Nagasaki
and were reported to be on the 7th June, 1922
in good, efficient, and safe working condition, at a pressure of
200 lb. per square inch on the main boilers. The approved
working pressure of the donkey boiler is ✓ lb. per square
inch.

The Record **LMC 6,22** (Lloyd's Machinery Certificate)
has been made in the Register Book, subject to Periodical Surveys
as required by the Rules.

PARTICULARS OF ENGINES.

EXTRACTS FROM THE SOCIETY'S RULES AND REGULATIONS.

While the Committee use their best endeavours to ensure that the functions of the Society are properly executed, it is to be understood that neither the Committee, nor the Society, are under any circumstances whatever to be held responsible for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default or negligence of the Surveyors, or other Officers or Agents of the Society.

Periodical and Occasional Surveys.—The machinery and boilers of all steam ships, and the donkey boilers of sailing vessels, are to be surveyed annually, if practicable, and in addition are to be submitted to a Special Survey upon the occasions of the vessels undergoing the Special periodical Surveys Nos. 1, 2, and 3, prescribed in the Rules, unless the machinery and boilers have been specially surveyed within a period of twelve months.

* * * * *

The boilers of all steam ships, and the donkey boilers of sailing vessels, are to be specially surveyed when six years old, and subsequently they are to be surveyed annually.

* * * * *

The screw shaft is to be examined annually, and drawn at intervals of not more than three years in the cases of shafts fitted with continuous liners, and of not more than two years in the cases of other shafts. On the application of Owners, the Committee will be prepared to give consideration to the circumstances of any special case.

Survey of Repairs.—All repairs of vessels, engines and boilers that may be required at ports where there is a Surveyor to the Society, in order that the vessels may retain their characters in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyor. When such repairs are effected at a port where there is no Surveyor to this Society, the vessel must be surveyed by one of the Society's Surveyors at the earliest opportunity.

Notice of Surveys.—Whilst the Society's Surveyors are required to attend for the purpose of holding surveys in their district, the duty of giving notice when the attendance of the Surveyors is required to carry out Periodical Special Surveys or to supervise repairs rests with the Owners, Master or Agents. If such notice is not given and the requisite surveys are not carried out, the characters of vessels are liable to be expunged from the Register Book.

*No. 71, Fenchurch Street,
London, E.C.*

ANDREW SCOTT,
Secretary.

[N.B.—It is to be understood that the foregoing requirements are subject to amendments made by the Committee from time to time.]
