

S.S. "STRIVER"

It is submitted the Middlesbrough Surveyors should be informed that the Owners stated in August last that they intended fitting into this vessel a set of machinery purchased from Messrs. Richardsons, Westgarth & Co., which had been built originally under the Society's supervision, and they should be asked to state whether they can confirm this and for what purpose the engines have been used between the time they were made and their conversion now.

The Surveyors should also be informed that the approved boiler plan does not appear to have been forwarded with their reports in this case and be requested to send on the same.
