

S.S. "BOMBARDIER".

This vessel was built by Messrs. Smith's Dock Co. in 1918 as one of the "KIL" Class fast Trawlers. She was built under the survey of the British Corporation, being similar to others constructed under this Society's survey (to plans mutually approved by Lloyd's Register and the British Corporation) which were originally classed "A1 "For Government Service".

The vessel came under survey at Sunderland from April to August 1920, when considerable alterations were made to render her suitable for carrying cargo, and she was classed by the Committee 100A1.

The question has now been raised as to when the Special Survey No.1 should be reckoned to become due, and in the circumstances it is submitted that the Society's Surveyors at Sunderland might be asked to state whether, in view of the amount of work carried out at that port when the vessel was converted for cargo carrying and classification with this Society, they are of opinion that the survey then held might be considered as a Special Survey No.3 in order that the 1st Special Survey No.1 might be dated from the completion of their survey.
