Twin Screw Steamer "MONTCALM", 16,418 tons gross.

This vessel has recently been built on the Clyde, and First Entry Reports have been forwarded from Glasgow.

She was launched on the 3rd July 1920, and in accordance with Paragraph 7, Page 10 of the General Regulations of the Society the date of build for vessels over 10,000 and under 20,000 tons gross should not be later than nine months after the date of launching.

The date of the last survey in the above case was the 9th December 1921, and the Surveyor states that the vessel has been placed in dry dock, found in good condition and re-coated, and the Glasgow Committee recommend to the General Committee that the Date of Build should be recorded as December 1921, the completion of the vessel having been delayed owing to the joiners' strike.

This recommendation is concurred in.
