Ana'd

Genoa, 25th October, 1958.

Dear Sir,

"BRITANNIA"

With reference to recent correspondence concerning the completion of the Special Survey on this ship, a survey afloat has now been held at Malta and we enclose a copy of a letter addressed to Mr. Hipwell setting out the findings and recommendations made.

The side shell plating was found in very poor shape, being corroded and heavily pitted both internally and externally in the "wind and water" area, in addition to several structural weaknesses, leakages etc.

The Owner expressed disappointment at the number of shell plates requiring renewal and it is possible that it may not be an economical proposition, at least in the meantime, to proceed with the repairs and completion of the Special Survey.

Mr. Hipwell will ascertain the Owner's intention in this respect, and supervise the repairs when and if made.

Yours faithfully

J.D. Sutherst
(J.D. Sutherst).
FOR THE SURVEYORS

The Secretary,
LONDON.

*submit Mr. Southworth be asked
if he had the opportunity to ascertain
the condition of the bottom shell. This
comment on this would be appreciated*
