

of Hawaii Marine

Freeboards were assigned on the 30<sup>th</sup> June last and communicated by cable to the Kobe Surveyor on that date.

No report has yet been received as to the freeboards having been marked although the date of last survey on the first entry report was 14 August last and it appears the vessel has again been under survey & at Kobe for Boiler survey in October last.

The classification is delayed for the marking of the freeboard which is a condition of class

It is submitted the Kobe Surveyor should be requested by cable to state whether the freeboards assigned have been correctly marked.

A reply by cable should be requested in order to expedite dealing with the first entry report for classification if possible
