† In vessels obtaining an allowance for deck erections under Para. 11 where the sheer drops abaft amidships the height of the R.Q.D. is to be taken from the level of the top of the amidship beam.
§ In flush-decked vessels the total standard mean sheer means the sheer measured at the stem and stern-

The Surveyor should state whether the fall in sheer as reported is measured from the line of keel or to the water line. If measured relatively to water line the vessel's draft at time of survey and also the usual load draft forward and aft should be reported.
