NAB

Dear Sirs,

Motorship "NONIA"

I acknowledge receipt of your letter of the 4th instant, the contents of which have been noted.

I have to inform you that in your letter to the Secretary to the Scottish Committee, Glasgow, dated 12.6.56. on the "BONAVISTA", the third paragraph reads "The working pressure is stated to be 15 lb. per square inch". In your report No. 23991 on the "NONIA" on Page 2 you give the working pressure 20 lb. per square inch, heating surface 167.5 square feet.

In the circumstances I shall be glad to learn which is the correct working pressure for these domestic boilers, as there are no plans or correspondence in this office in this connection, these apparently having been retained in the Glasgow office.

Yours faithfully,

pro Clerk to the  
Classification Committee.

The Surveyors,  
ABERDEEN.
