HELLENIC LEVANT LINES LIMITED

Aden November 19th 1960.

To the Lloyd's Register of Shipping

S U E Z

Dear Sirs,

S.S. "DANAE"

This vessel has loaded from Mersina by end of July a full cargo of sugar for Aden and she was supposed to complete her trip including her return trip to Suez by end of September. Unfortunately she was since August 14th up to November 6th laid up in Beurouth and she sailed only this date to Aden. She passed the Canal on the 9th November and she is expected today in Aden. Consequently she will be in Suez early December. We mention all these as a proof that the delay is due to facts out of our good will and no intermediate voyage has been undertaken.

On her arrival in Suez we are definitely intending to have the boiler survey and also drydocking. Regarding drydocking we are endeavouring to get a free date for the drydock either in Suez or even Aden. However it seems that both drydocks are booked. The Suez one is tied up with Cleopatra and it seems likely to be free by middle of December.

The vessel is fixed on consecutive voyage from Suez to Aden and in case that the drydock will not be available early December you are kindly requested to agree that we carry the boiler Survey and be drydocked on our next call to Suez say December 15/20 when the drydock will be available. Of course in case that we shall be lucky enough to have the drydock free early December we will definitely use it.

Please let us have your reply c/o Messrs. Beyts & Co. Suez.

Sincerely yours
Hellenic Levant Lines Ltd.
