REPRESENTATIVE IN CANADA OF AMERICAN BUREAU OF SHIPPING

PROVISIONAL CERTIFICATE OF BOILER

No. 6381

Multitubular

THIS IS TO CERTIFY that the Single Ended Boiler

made by Canadian Vickers, Limited, Montreal. Quebec, for the
S.S. "FORT CATARAQUI" (Davie Shipbuilding Co. Limited, yard
no. 538) and marked as below, has been surveyed during construction
by the Undersigned.

The material has been tested by the Surveyors to British Corporation
Register; the scantlings are in accordance with the Society's Rules
for a working pressure of 220 lbs. per square inch, and the
workmanship is good. The Boiler having been tested in my presence
on the 29th July 1942 by hydraulic pressure to 380 lbs. per square
inch, showed no signs of weakness, and was found tight and sound in
every respect at that pressure. Working pressure not to exceed Two
Hundred and Twenty lbs. per square inch.
